

Compliance Statement

Registration, Evaluation, Authorization and Restriction of Chemical Substances

The EU Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) aims to improve the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances.

The REACH directive outlines the various obligations applicable to Huddly's products and the requirements regarding articles. Specifically, REACH requires Huddly:

- to inform recipients if an article placed on the European market contains a Substance of Very High Concern (SVHC) in excess of 0.1% by weight. The list of SVHC candidates is available on the European Chemical Agency (ECHA) website, and is updated twice a year.
- to notify ECHA if an article containing SVHC in excess of 0.1% by weight and the total amount of the SVHC articles produced or imported to the European market exceed one metric ton per year in the case that chemicals could be released from the article over time.
- to cease shipment of all articles containing substances as defined in REACH Annex XIV ("authorization list") unless authorization has been obtained.
- to cease shipment of all articles containing substances as defined in REACH Annex XVII ("list of restrictions") when restrictions apply.

The following applies unless otherwise stated in individual product conformity declarations.

Having evaluated supplier certifications and material composition declarations, as well as Huddly's specifications, Huddly has, to the best of its knowledge and belief, determined that:

- Huddly products does not contain the substances within the SVHC Candidate List in excess of 0.1% by weight per article as last published by ECHA before the signature date of this statement.
- the weight of the SVHC Candidate substances contained in Huddly products shipped into the EU has not exceeded one metric ton per year and annual reporting to ECHA is not required.
- Huddly products does not contain the substances within the Authorisation List (Annex XIV) as detailed in the regulation and as last published by ECHA before the signature date of this statement.
- Huddly products limit the use or does not contain substances found on the Restriction List (Annex XVII) as detailed in the regulation and as published before the signature date of this statement.

On behalf of Huddly AS
Graham Williams, CEO
