# Introduction

Huddly S1 is a network collaboration camera that delivers smart user experiences in medium and small meeting rooms. Designed to make video meetings inclusive and productive for the whole team, it provides instant, responsive framing, and Full-HD video of everyone in the room. Huddly L1 is compact and unobtrusive, with no moving mechanical parts.

## Installation

If you have the Huddly USB Adapter all you need to do is connect the cables, there is no need to install any software.

If you have the Huddly Network Adapter you need to get the latest version of the Huddly S1 software at <https://huddly.com/setup>. Download and execute the software package, and follow the instructions on the screen to enable the use of Huddly S1 in all video enabled Windows applications.

**When upgrading from versions 1.1.2 or older you should make sure that the Huddly Network adapter is connected during the update process. When the update process is over, disconnect and reconnect the USB-C cable to the Network adapter.**

**If the Huddly S1 ended up in a state where it is not working after updating, please have a look at this [FAQ article](#).**

## Requirements

- Windows 10
- Administrator privileges
- A USB 3.0 port

# Release details

## Release 1.5.19

### Huddly S1 Camera firmware 1.5.19

This releases includes:

- Introduction of Huddly Director on S1
- Improved white balance stability
- Improved dewarping to reduced stretching on the side of the image
- Improved framing accuracy in Genius Framing and Huddly Director

### Known issues

- N/A

### Known limitations

- Image noise might occur when the camera zooms in far.
- No support for detecting remote audio on macOS.

### Huddly USB Adapter firmware 1.7.4

This release includes:

- The Huddly USB Adapter will no longer automatically upgrade the camera firmware
- Brightness control added to UVC
- Improved UVC stream stability
- Removed USB from camera name
- XU command support

### Known limitations

- USB High Speed only
- No Windows Update support
